

# **Abnormal Psychology**

(PSY 366-80439) Fall 2015

Tess Neal, PhD

Honors Enrichment: Honors students shaped this enrichment activity for the course. They chose to work individually and as a group to research case studies from mass shootings in the U.S., meeting as a group to discuss similarities and differences in the cases from an abnormal psychology perspective. We then watched “Birdman” together across a few weeks’ meetings and discussed the aspects of abnormal psychology depicted in the film.
